

## Education

The paradigm must change regarding education reform in America. Many new technologies and methodologies have proven successful in school systems worldwide. My education reform program utilizes these new advancements in education. It includes a Primary and Secondary Education Fund (PSEF) that provides every school district throughout the U.S. with an equal minimum disbursement of \$16,390 per student each school year. Besides ensuring all education needs are met, the PSEF covers all medical and special needs of children. School staff are uniquely positioned to identify a child's needs and make referrals before issues become chronic or problematic. States with a higher annual funding requirement will be required to make up for that difference through state funding. Funds are tied directly to each student and follow them wherever they attend school, public or private.

## America Needs Us

You and I can save America if we put aside our differences and work together. It is my hope that you like my solutions on how we can solve America's problems. If you like my ideas, then please consider voting for me. Have a conversation with your family and friends then ask them to consider voting for me. I do not want your money; I want your vote. As your Representative, I make you this promise: I will not lie to you. I will tell you the straightforward truth I learned through extensive research. We deserve the truth; we demand the truth from our government. If you give me the honor of being your representative, I will be your voice of truth. May God bless you, and God bless America!

For Congress  
U.S. House  
Texas District 35**

## **About Me Rod Lingsch**

Hi, my name is Rod Lingsch. I am taking on the devout socialist Greg Casar to support you in Texas' 35<sup>th</sup> Congressional District. I believe I will win this district if I can get my ideas out to voters on how we can solve America's problems, and it would be my honor to serve you as your Representative!

Despite growing up on welfare, I worked hard to achieve my dream, and it was God's grace that showed me the path to my success.

During college, I worked as an engineer in radio and TV. After college, I served 22 years as an Air Force officer and leader who thrived mentoring junior officers. Aircraft commander of the F-111D & F fighter jets and AETC Instructor Pilot. Deployed into combat as a pilot and with the Army on the ground. After the USAF, I owned and operated a successful business. 10 years Texas police officer. From 2010 to 2021, I was a defense contractor with a TS clearance. I flew Intelligence, Surveillance, and Reconnaissance (ISR) missions for Homeland Security with Border Patrol Agents in Texas and Arizona. I flew ISR for the military and State Department in Iraq and Afghanistan. I worked at the Hamid Karzai International Airport in Kabul, where we trained Afghan Air Force Officers from the 777 SMW in ISR operations. We were ordered out of Afghanistan in 2021 based on intel about the Taliban. Returning home, I worked as a corporate pilot.

My passion for learning has made research my main hobby over the last 55 years. As a pilot, I worked with, trained, and met thousands of people across America and worldwide. I discussed my solutions for America's problems with people who would tell me I should run for

political office. I feel compelled to run for office because America has become so divided. We must start working together to fix America's problems. We must elect people to office who can actually solve America's problems. Take a look at my reform ideas. Invite your family and friends to look at these ideas and have a conversation about them. If you like my ideas, then please consider voting for me.

## **Tax Reform**

The federal government imposes more than 100 taxes and fees on Americans. Add state taxes, and it will take the average worker 6 months to pay their tax liability. Despite record revenue of \$13.4 trillion over the last 3 years, the federal government still added \$6.5 trillion to the federal debt. My Currency Usage Tax (CUT) eliminates all current federal and state revenue sources by replacing them with a single flat tax. Eliminating income and payroll taxes increases a worker's spending power and will give them greater opportunity to invest and save. Eliminating property tax means people can pay off their homes or businesses sooner, and the government no longer has the power to take property through taxation. Eliminating all small business taxes and fees affords them the opportunity to hire more people, pay better wages, and provide more goods and services. Eliminating corporate taxes will likewise allow corporations to hire more workers, increase salaries, improve inventories, and create more products at a lower cost. CUT eliminates America's convoluted and burdensome tax structure by returning to its Constitutional mandate of a uniform tax based on economic productivity. Utilizing a 1% tax on the U.S. Dollar Daily Funding Flows of \$7.5 trillion will produce a revenue stream of \$75 billion per day, equating to more than \$27 trillion annually. CUT is now the only way to pay off the \$34 trillion federal debt.

## **Welfare Reform**

The federal government maintains 83 different welfare programs. Include every state program, and that number jumps to more than 600. Currently, over 200 million Americans receive some form of welfare support. Since 1935, our government has spent more than \$40 trillion on welfare and entitlement programs. The only time the poverty level dipped below 11% was in 2018 and 2019. My welfare reform replaces all federal and state programs, saving \$2 trillion annually. It is not welfare but a Supplemental Income Pay (SIP) that will match any job up to 40 hours per week and volunteer work up to 60 hours per week. SIP will match the federal minimum wage, including any state cost of living adjustment up to a maximum of \$78,300, the GDP per capita. My welfare reform immediately lifts the poor out of poverty and into the middle class without any conditional requirements.

## **Healthcare Reform**

My healthcare system consists of seven distinct proactive programs, each serving a specific purpose and need. Every citizen is required to participate in Primary and Essential Healthcare. PHC handles outpatient care, and EHC covers inpatient care. People participate in Chronic Healthcare, Mental Healthcare, Assisted Living Care, Risk and Recovery Care, and Aesthetic Healthcare based on their specific needs. All USCF healthcare programs operate in the free market to create competition that improves quality while keeping costs low. Healthcare for children is integrated and funded through the school district where they live to have no premiums or copays. Once implemented, my healthcare reform can save \$1.5 trillion per year.
